

2022 Impact Plus Formulary List

The 2022 Impact Plus drug list is shown below. The formulary is the list of drugs included in your prescription plan. Inclusion does not guarantee coverage. The following list is not a complete list of products that are on the formulary.

PLEASE NOTE: Brand-name drugs may move to non-preferred status if a generic version becomes available during the year. Not all the drugs listed are covered by all prescription plans; check your benefit materials for the specific drugs covered and the copayments for your prescription plan. For specific questions about your coverage, please call the phone number printed on your ID card.

KEY

[PA] – Prior Authorization Requirement

[ST] – Step Therapy Requirement

Brand-name drugs are listed in CAPITAL letters. Example: ABILIFY MAINTENA. Generic drugs are listed in lower-case letters. Example: ibuprofen.

For the member: FDA-approved generic medications meet strict standards and contain the same active ingredients as their corresponding brand-name medications, although they may have a different appearance.

For the physician: Please prescribe preferred products and allow generic substitutions when medically appropriate.
